Steelhead Fasteners

A Higher Standard™

PRODUCT CATALOG

A HIGHER STANDARD™

Thanks for taking a closer look at the Steelhead Fasteners family of products. We are committed to providing the highest quality in both our products and customer service.

Our passion for quality starts with choosing select manufacturing partners who share the same passion for quality as we do. We feel the lowest price is often not the best value for us, and more importantly, for our customers. Every shipment that arrives to our warehouse goes through a rigorous quality control process, real tool testing of the product, as well as visual and instrumental verification of specifications.

GUIDE TO FASTENER COATINGS

STAINLESS STEEL

AISI 304 & 316 Grade Stainless Steel is a metal alloy that by itself is extremely corrosion resistant, without the addition of any chemical coatings. Several manufacturers of ACQ treated lumber recommend Stainless Steel fasteners as the ultimate protection, especially in high moisture and coastal environments. All STEELHEAD Stainless Steel collated fasteners meet or exceed the AISI 304 & 316 Grade Standards. If you're comparing fastener to fastener, Hot-Dipped Galvanized fasteners will be the lowest cost recommended for use with ACQ. For the highest-level of corrosion protection, Steelhead promotes Stainless Steel fasteners.

HOT-DIPPED GALVANIZED

STEELHEAD Fasteners Hot-Dipped Galvanized fasteners withstand corrosion for a much longer period of time than non-coated and electro-galvanized coated metals. Our nails are completely and evenly covered providing the thickest layer of zinc coating and ensuring that this process meets the specifications for ACQ and other pressure treated lumber. All of our hot-dipped collated fasteners meet or exceed ASTM A153 standard for hot-dipped galvanized. An independent laboratory test was done to measure the amount of zinc on our nails. The plastic strip framing nail (3-1/2" x.131" hot-dipped galvanized) weighed in at 1.78 ounces per square foot, exceeding the ASTM requirement of 1 ounce per square foot.

ELECTRO-GALVANIZED

STEELHEAD Fasteners Electro-Galvanization plates the nail in a zinc coating via electrical charge. Electro-Galvanized fasteners are used in mild weather conditions and in areas with lower humidity. The nails are submerged into an electrolytic solution where an electrical current coats them with a thin layer of zinc. However, after prolonged exposure to the elements, the thin layer of zinc oxidizes, leaving the fastener subject to normal rusting and staining.

BRIGHT

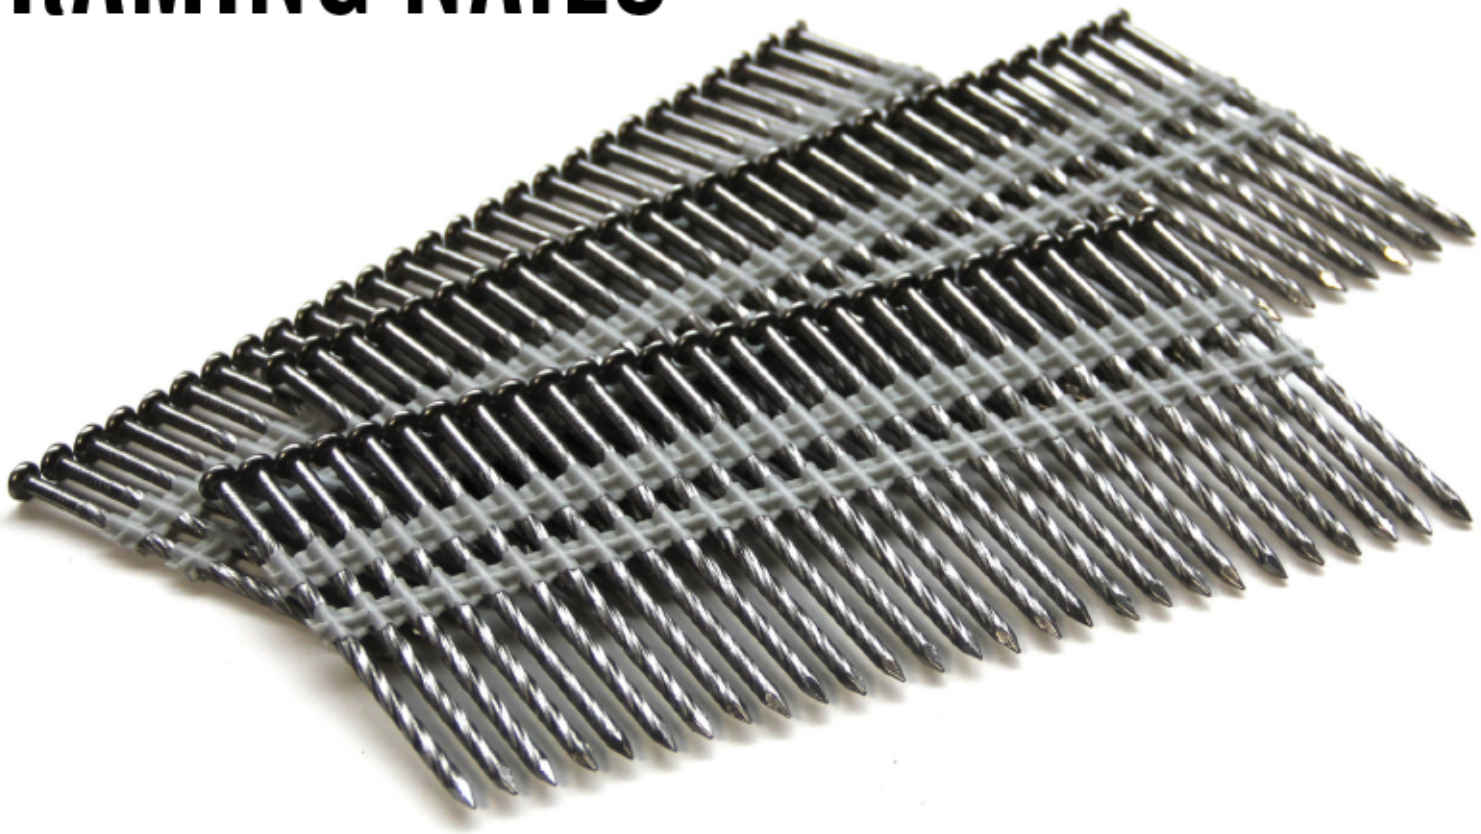

STEELHEAD Fasteners Bright fasteners are uncoated steel and have no anti-corrosive protection. Used mainly in finish carpentry and furniture manufacturing, bright fasteners are also the most common for residential interior framing applications. Bright finish fasteners will cause rust stains and streaks if used in areas of even minimal moisture exposure.

THINGS TO CONSIDER

- ARE YOU WORKING IN A COASTAL REGION?
- WILL YOUR PROJECT BE EXPOSED TO MOISTURE?
- IS STRENGTH AND CORROSION RESISTANCE IMPORTANT?
- DO YOU NEED/WANT THE HIGHEST QUALITY PRODUCT AVAILABLE?

FRAMING NAILS

STEELHEAD FASTENERS

20 - 22° FULL ROUND HEAD PLASTIC COLLATED FRAMING NAILS

For interior and exterior housing frame work. STEELHEAD FASTENERS framing nails are available in Stainless Steel, Hot-Dipped Galvanized, and Bright finishes. Also available in ring and screw shank. They will fit most 20° - 22° full round head framing nail guns.

STANDARD TERMS & CONDITIONS

ORDERS

1. Orders can be received via Phone, Email, or Fax.
2. Confirmations will be sent out prior to order shipment to ensure accuracy.
3. No order minimum.

SHIPPING

1. Shipping available via Steelhead Truck (local), LTL, & UPS Ground.
2. Collect and Third Party shipments are allowed.
3. Expedited shipping is available at an additional cost.
4. Please inform us if you have any special delivery instructions at time of order.
5. Fees incurred due to incorrect addresses, special instructions, or missed deliveries will be passed onto the customer.

PREPAID FREIGHT

1. Prepaid freight is available to most locations, ask your salesrep for your minimum.
2. Steelhead will select the most economic carrier available.
3. Orders below the prepaid freight minimums are subject to a freight charge.

RETURNS

1. Returns not allowed without prior written authorization.
2. No returns will be accepted after 30 days of the invoice date.
3. All returns are subject to a 25% re-stock fee.
4. Freight charges will not be refunded.
5. Dropship orders are not eligible for a refund.

PRICING

1. Pricing is subject to change or modification without notice.

BACKORDERS

1. Items not available at the time a purchase is made are treated as individual orders and are subject to prepaid freight requirements when the item becomes available.
